

Ver	Title	Description	NAV
01.18	Agreement Setup List / Overenskomstopsætningsliste - renumber	New action to renumber Sequence field. Fixes the possibility of inserting new lines at the top or in between existing lines.	ALL
01.18	Registration add-on / Registreringstillæg - Time Counter	New fields on Registration add-on (Registreringstillæg) to enter a Time Counter (Tidstælleværk) and a Factor. This would lead to inserting an extra line in Calculated lines (Beregne linier) during Time Calculation (Beregning).	ALL
01.18	Specification of Time and Payment (E-mail) - Sender address	It's now possible to select/change the sender E-mail address when mailing Specification of Time and Payment (Specifikation af tid og lønlinier).	ALL
01.18	JobManNavEventPublisher - new events (developer)	New events - OnCodeunit_JobManPaySpecificationPDFemail_Addresses - OnCodeunit_JobManRegJournalFunctions_GetJournalTotal - OnAfterCopyRegJournalLine - OnTable_JobManEmployee_StatusText - OnTable_JobManEmployee_GetAbsenceRequired - WS_RegInsert - WS_RegModify - WS_RegDelete	ALL
01.18	Error Message if JobManager updated and missing data upgrade - extended	This check was introduced in 01.17 (see Changelog). Now extended to: - Time Sheet (Timekladde) - Registration Cockpit (Registrering Cockpit)	ALL
01.18	IPC Activity of type Break without Break Schedule Type (Warning)	The page with IPC now warn with an NAV page notification, if an IPC Activity of type Break (Pause) is missing Break Schedule Type (Pause skematype). This only applies to NAV from version 2017 and above.	NAV2017 NAV2018 BC13 BC14 Extension
01.18	Time Sheet - Copy from another day (Postingdescriptions)	Copy from another day now also copies the Postingdescription1 and 2.	ALL APP
01.18	Time Sheet (Week) / Timekladde (uge) - FactBoxes	Two new FactBoxes for Comments (Bemærkninger) and Job Details (Job detaljer). Can be shown/hidden with JobManager User Interface.	ALL
01.18	JobManager Role Center Actions Calculation missing and Approval missing	Now skip current date when count missing Calculation/Approval.	ALL
01.18	Registration Cockpit - improvements	Selecting "Start Team" now indicated on Commit (Acceptor) and Selected (Markeret). Team Start registrations not counting as Active Jobs.	ALL
01.18	Registration Client / Job kø - Refresh time (fix) / Opdater tidspunkt (fix)	The new option in 01.17 on JobManager User Interface to allow the registrationtime to be updated upon every new registrations has been improved. Now the Profile Date is also updated. Fixed handling of selecting Absence. As well as additional required checks and updates. This also applies to the new Registration Cockpit.	ALL
01.18	Formula expressions - decimal separator	Entering formulas now support both . (period/point) and , (comma) as decimal separator. Formulas are e.g. used on Agreement Setup (Overenskomstopsætning).	ALL
01.18	Clock-in too late by selecting job directly	When a clocked-out Employee is starting a job, the system will automatic make a Clock-in registration. If selecting Absence is required, the Employee could end up in a situation, where "Cancel" ("Fortryd") were the only option. Now a warning is given when selecting a job, if Absence is required.	ALL
01.18	Posting time to Job and Service Line - missing Work Type	An error where introduced in 01.17 regarding posting to Job and Service Line. The Work Type were missing when posting. This fix was included in the latest 01.17 patch.	ALL
01.18	Export Pay Transactions (EG Lønservice)	Export format for danish payroll system "EG Lønservice".	ALL
01.18	Time Schedule Overview / Tidsskemaoversigt	New matrix page to show Time Schedule (tidsskema) per Employee per day/week/month.	ALL
01.18	Time Sheet (Week) / Timekladde (uge) - Minor bugs fixed	Minor bugs fixed. Corrected labels for Work Type (Arbejdstype). Regarding header lines: - Prevent delete - Prevent change fields Job Id and Favorite. Regarding lines with underlying Journal Lines: - Prevent delete - Prevent change fields Job Id and Favorite. Regarding lines marked as Favorite: - Prevent delete - Prevent change fields Job Id. This fix was included in the latest 01.17 patch.	ALL
01.18	Rename Time Counter (Tidstælleværk)	Now rename the values in Calculated lines (Beregne linier).	ALL
01.18	Time Calculation and Approval / Beregning og Godkendelse - Notifications optimized	Notifications in page Time Calculation and Approval (Beregning og Godkendelse) has been extended. Counting number of missing Calculation and Approval. And a notification is always shown to prevent flicker in the page.	NAV2017 NAV2018 BC13 BC14
01.18	Employee of type Machine (changed functionality)	Marking Employees as Machine now only applies to deviding registrations at midnight. All other functionality split into new parameters: - JobManager User Interface field Refresh time (Refresh time) - JobManager User Interface field Continue registration on Commit (Fortsæt registrering ved Acceptor) - JobManager Employee field Skip Clock-In & Clock-Out (Uden Komme & Gå To be backwards compatible a new JobManager User Interface is made for each Employee marked as Machine. Furthermore a bug has been corrected regarding Time Calculation without Clock-In & Clock-Out in combination with Time as Net under Setup.	ALL
01.18	JobManager User Interface - Quit registration on Commit	New field Quit registration on Commit (Forlad registrering ved Acceptor) on JobManager Employee. This will force exit the registrations pages on Commit (Acceptor).	ALL
01.18	Setup blocking transactions based on date	Four new Date Formula fields added to JobManager Setup. Making it possible to block transactions relative to date for: Time Registration, Time Calculation, Posting to NAV and Create Pay Transactions. Default setup to Time Registration 10 days ahead and prevent Time Calculation for tomorrow and onwards. To protect "master" company during initial implementation all fields could be set to "-10Y" (-10Å).	ALL
01.18	Agreement Setup Formula - Specify per Stamp Journal Line	New field to extend previous specification on Job Id to Stamp Journal Line (Journalstempling).	ALL
01.18	Missing Period Lines	Showing error if Period Lines are missing. Previously, some functions could go into infinite loop.	ALL

01.18	Pay Export in Web Client	Due to lack of functionality in the standard Web Client from Microsoft, XMLports couldn't be run correct. A work around has been made to fix this missing standard Microsoft functionality.	NAV2017 NAV2018 BC13 BC14
01.18	Disable Notifications on Stamp Warnings/Errors / Stemplingssadvarster/-fejl	Notifications in the Time Calculation and Approval (Beregning og Godkendelse) page can now be disabled within My Notifications (Mine notifikationer).	NAV2017 NAV2018 BC13 BC14
01.18	APP minor performance improvements (developer)	Changes made to minimize the call to XMLport when retrieving data.	ALL APP
01.18	Pay Export in Extension	XMLports for Pay Export didn't set default filters and values. This could lead to missing sum peer Pay Type and Rate. Developer: Due to missing OnOpenPage trigger. This is an error in Microsoft Txt2Al.exe, which is part of the building process of Extensions.	Extension
01.18	Custom Fields / Tilpassede felter - Modify permission	This only applies to JobManager as Extension. Permission Sets created as part of an Extension (e.g. the JobManager Extension) couldn't be chosen as Modify permission on JobManager Custom Fields table.	Extension
01.18	Time Sheet / Timekladde - Clock-in/-out time as Timestamp / Tidspunkt	Regarding the field Default Clock-in/-out time (Foreslået Komme/Gå tidspunkt) added to JobManager User Interface in 01.16, to control the behavior of time of Clock-in (Komme) and Clock-out (Gå). If selected value is Timestamp (Tidspunkt), this also applies to registrations ahead in time. See online help for further information.	ALL
01.18	Posting to NAV with NAV Job Queue - Priority	Some newer versions of NAV/BC doesn't respect the standard Priority field on Job Queue Entries (Opgavekøposter). That could lead to e.g. a production being reported as finished before the reported quantity (leading to a standard NAV error). To get around this standard NAV/BC issue, JobManager now make a minor (under one second) delay on Job Queue Entries (reflecting the Priority). If the same registration has more pending Stamp Events (stemplingshandling) another minute is added.	ALL
01.18	JobManager Job - sum Actual Qty	Sum fields Actual Good Qty (Faktisk gode antal) and Actual Scrap Qty (Faktisk kasserede antal) changed. Previously, it sums up records from Stamp Journal Line (journalstemplinger). Now, it sums up records from Stamp Event (stemplingshandling), and skips lines with status Skip (Udelad).	ALL
01.18	Pay Events - Specify per Stamp Journal Line	New field Specify per Stamp Journal Line (Specificere pr. Journalstempling) on Agreement Setup Formula (Overenskomstsopsætningsformel). whether or not Pay Events (Lønlinier) should be specified for each Stamp Journal Line.	ALL
01.18	Time Sheet (Week) / Timekladde (uge) - Change sort order	Changed the way lines are sorted. Now favorites are listed first.	ALL
01.18	Time Sheet (Week) / Timekladde (uge) - Skip Clock-In & Clock-Out / Uden Komme & Gå	Time Sheet (Week) (Timekladde (uge)) now support the new parameter on JobManager Employee Skip Clock-In & Clock-Out (Uden Komme & Gå).	ALL
